INFORMATION REPORT

CD NO

25X1A

COUNTRY Germany (Russian Zone)

DATE DISTR 4 April 1952

SUBJECT Elektrochemisches Kombinat Bitterfeld

NO. OF PAGES 1

PLACE ACQUIRED 25X1A

NO. OF ENCLS.
(LISTED BELOW)

DATE OF INFO

SUPPLEMENT TO REPORT NO.

25X1A

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1X

SOURCE

1. The power plant of the Electrochemical Combine in Bitterfeld (M 52/E 14) has a steam generating installation with 11,200 boiler tubes. The boiler tubes are in a very bad condition as no replacements have been made for 10 years. There are only 27 reserve boiler tubes in the plant.
2. The boiler tubes, supplied by Czechoslovakia, were not strong enough to stand the pressures and the high temperature. Therefore, the power plant has to rely on boiler tube imports from western Germany or other western countries in order to make urgent repairs or the necessary replacements.
3. The plant contacted the Escher Wyss Turbine Factory for the purchase of new turbine blades. The performance of the power plant will probably be considerably reduced in a comparatively short time if imports are not obtained from western countries. The same boiler tube shortage also exists in the Leuna (M 52/D 91), Schkopau (M 52/D 91), Nachterstedt (M 52/D 46) and Deuben (M 52/K 08) power plants and in the Wolfen (M 52/E 14) Film and Dye Factory. *

25X1A

* ☐ Comment: The Escher Wyss Plant is probably the Escher Wyss Machine Factory G.m.b.H. in Ravensburg (L 48/X 41), Württemberg. The production of this plant includes water and steam turbines, pumps and compressors. The Nitrogen Plant in Leuna, the Duna Plant in Schkopau, the Low Temperature Distillation Plants in Nachterstedt and Deuben, and the Film and Dye Factory in Wolfen, as well as the Electrochemical Combine in Bitterfeld, are all SAG plants. These plants produce motor fuel, synthetic rubber (Duna), and chemicals required in the armament industry.

25X1A

☐ Comment: The above-mentioned Escher Wyss plant might also be the Escher Wyss Aktiengesellschaft, Zurich, Switzerland, which manufactures turbines.
